

Youmna Mustafa Hassan

FRONTEND DEVELOPER

Egypt | yournamostafa93@gmail.com | +201150014486 | [LinkedIn](#) | [GitHub](#)

SUMMARY

Front-end Developer specializing in developing and maintaining web applications. Skilled in creating user-friendly interfaces and delivering scalable, efficient solutions. Passionate about continuous learning and staying updated with industry trends, Proficient in HTML5, CSS3, JavaScript, React.js, and Next.js, with a strong focus on building responsive and high-performance web applications Experienced in working with RESTful APIs and integrating dynamic data. Able to take projects from idea to final deployment, ensuring a complete and professional delivery process

EDUCATION

Bachelor of Information Technology-The Egyptian E-learning University (2020-2024)

PROFESSIONAL EXPERIENCE

Front End Instructor (Freelance)

Remote | 2024 - Present

- Designed and delivered a full front-end development curriculum covering HTML, CSS, JavaScript, React.
- Mentored students through real-world projects and portfolio building, emphasizing clean code, responsive design, and modern development practices.
- Provided personalized feedback and technical support to help learners overcome challenges and improve coding proficiency.

PROJECTS

Portfolio

- A modern, responsive portfolio built using Next.js App Router, Tailwind CSS, and Framer Motion.
- Showcases personal projects, tech stack, and contact info in a clean and structured layout.
- Smooth page transitions and animations powered by Framer Motion.
- Fully responsive design optimized for desktop and mobile viewing.
- Built with modular components for scalability and reusability.
- GitHub: <https://github.com/yournna7878/portfolio>
- Live Demo: <https://portfolio-hgje.vercel.app/>

Fresh Cart – E-Commerce app

- A fully functional e-commerce application built with React, React Router, Context API, Tailwind CSS, and Formik.
- Features include user authentication, product browsing, category filtering, cart management, checkout, and order confirmation.
- Admin panel allows product, category, and coupon management.
- Form validation is handled with Formik & Yup, and responsive design ensures usability across devices.
- Built with clean architecture and deployed on Vercel.
- GitHub: <https://github.com/yournna7878/e-commerce-app>
- Live Demo: <https://e-commerce-app-nu-taupe.vercel.app/>

School Management Dashboard – Admin UI Panel

- A responsive and interactive admin dashboard for managing school data, built with Next.js App Router and Tailwind CSS.
- Features include overview cards, student charts using Recharts, and a modern sidebar navigation.
- Developed using modular and reusable components for scalability.
- Form handling and validation implemented using React Hook Form and Zod.
- Fully responsive and optimized for performance across all screen sizes.
- GitHub: <https://github.com/youmna7878/dashboard>
- Live Demo: <https://dashboard-sigma-sand-43.vercel.app/>

Notes App – CRUD Notes Management System

- A responsive note-taking application built with React, Axios, and React-Bootstrap.
- Users can create, update, and delete notes with instant feedback and validation.
- Form validation implemented using Formik and Yup for smooth user experience.
- Clean and modular React structure with reusable components.
- Fully responsive UI with clear layout and styling using React-Bootstrap.
- GitHub: <https://github.com/youmna7878/Notes-App>
- Live Demo: <https://notes-app-wine-theta.vercel.app/>

Recipe App – Responsive Recipe Browser

- A responsive web app for browsing food recipes, built with React.js, Tailwind CSS, and SCSS.
- Fetches and displays recipes dynamically using an external API.
- Clean, minimalist UI with responsive layout for all screen sizes.
- Styled using a combination of Tailwind CSS and SCSS for flexibility and consistency.
- Modular component structure for reusability and clarity.
- GitHub: <https://github.com/youmna7878/Recipes>
- Live Demo: <https://recipes-eight-gamma.vercel.app/>

Weather App – Real-Time Weather Forecast

- A responsive weather application built with React.js and OpenWeatherMap API.
- Fetches and displays real-time weather data including temperature, humidity, and wind speed.
- Developed with modular React components and clean architecture.
- Fully responsive design with a minimalist and intuitive interface.
- Handles loading states and API errors gracefully to ensure smooth UX.
- GitHub: <https://github.com/youmna7878/weather-app>
- Live Demo: <https://weather-app-three-irid-22.vercel.app/>

SKILLS

Tech Stack: HTML, CSS, JavaScript, TypeScript, SASS, Bootstrap, Tailwind CSS, JQuery, React, Next JS, Axios, React-Router-Dom, React Query, React Hook Form, Formik, Yup, Context API, Material UI, Redux-toolkit, framer motion, Git & GitHub, Responsive Design

Soft Skills: Problem-solving, Time management, Team collaboration, Communication
